

Amendments to the Specification:

On page 1, immediately after the title of the application, please delete lines 4, 5, 6 and 7 and insert the following new paragraph:

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a continuation of International Application No. PCT/KR01/01808, filed October 25, 2001, which claims priority from Korea Patent Application No. 2201-28430 filed on May 23, 2001 and which are both hereby incorporated herein in their entirety by reference.

Please insert the following Abstract on page 17:

ON-LINE MUSIC DATA PROVIDING SYSTEM VIA BLUETOOTH HEADSET

ABSTRACT OF THE DISCLOSURE

Disclosed is an online music-data-providing system via a Bluetooth headset which comprises: a music-data-providing server for providing music data through a network; a mobile communication system connected to the network; a mobile station for wirelessly accessing the mobile communication system and performing the Bluetooth protocol; and a Bluetooth headset installed in a vehicle, having a Bluetooth function for performing the Bluetooth protocol, for performing short range radio links by the Bluetooth protocol to the mobile station, receiving the music data from the music-data-providing server through the mobile station, reproducing them, and outputting them. Therefore, since the music files distributed by the music-data-providing server are encoded, they may not be transmitted or reproduced to other devices except the headset. The present invention provides various categories of contents in addition to the online music data distribution service through the headset. Also, user convenience is improved by using various functions of the headset such as the intercom function.
